RE: TLT-2026-07-0762, "Automatic Bloom's Taxonomy Question Generation Using RAG and ModernBERT Classification with Regenerative Feedback"
Manuscript Type: Regular paper

13-Jul-2026

Dear Dr. Sunaryono,

Thank you for your submission to the IEEE Transactions on Learning Technologies.

The document (<https://ieee-edusociety.org/publication/about-publications/tlt>), the IEEE Transactions on Learning Technologies describes the scope of papers published by the journal, which includes scholarship on all aspects of learning technologies. However, TLT is somewhat unique among educational technology journals given our dual-discipline focus on CS (computer science) and LDTech (Learning design and technology). In order to be considered for publication in TLT, articles must make substantive technical and/or design knowledge in the development of learning technologies as well as convincingly demonstrate how the technologies can be used to support learning.

Unfortunately your paper lies outside this scope definition and is thus regrettably ineligible for publication with TLT.

We are aware that considerable effort that has gone into your paper, and one avenue we can suggest is to submit your work to the IEEE Access open access multi-journal which has a much broader scope and mission. We hope you continue to view the IEEE as the premier publisher through which to disseminate your research and look forward to future submissions that are within the defined scope of IEEE IEEE Transactions on Learning Technologies.

Sincerely,

Minjuan Wang (EIC)
Editor-in-Chief
IEEE Transactions on Learning Technologies
